

GUL RAHMAN

MERN Stack Developer • Full-Stack Web Engineer

gulr83447@gmail.com | +92 316 9860636 | Lahore, Pakistan | [Linkedin](#)

PROFESSIONAL SUMMARY

Software Engineering graduate and MERN Stack Developer building full-stack web applications with MongoDB, Express.js, React.js, and Node.js. Skilled at developing responsive React Front ends, designing REST APIs, and connecting them to MongoDB databases for real-time, data-driven features. Strong foundation in core engineering principles a track record of shipping complete, end-to-end projects. Seeking a MERN Stack Developer role to build scalable, high-quality applications within a collaborative engineering team.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, UI/UX Fundamentals

Backend: Node.js, Express.js, REST API Design & Integration

Databases: MongoDB, Mongoose, MySQL

Engineering: OOP, Data Structures & Algorithms, SDLC, Problem Solving

Tools & Workflow: Git, GitHub, VS Code, Cross-Browser Debugging, Code Reviews

WORK EXPERIENCE

MERN Stack Developer Intern

Feb 2026 – Present

IIFA Tech

Lahore, Pakistan

- ▶ **Built and shipped** responsive, mobile-first web interfaces with React, JavaScript, HTML, and CSS, ensuring consistent rendering across major browsers and devices.
- ▶ **Developed** REST APIs with Node.js and Express.js and integrated them with React Front ends, optimizing data fetching and overall application performance.
- ▶ **Modelled and managed** application data in MongoDB, building end-to-end features that connect the database, server, and client across the full MERN Stack.
- ▶ **Wrote** clean, modular, reusable code following best practices and contributed actively to peer code reviews to uphold code quality and architectural standards.
- ▶ **Diagnosed and resolved** layout, logic, and performance issues, improving page load efficiency and delivering a smoother end-user experience.

PROJECTS

Online Food Ordering Platform

React • Node.js • Express • MongoDB

- ▶ Designed and built a Full Stack food ordering web application end to end, handling both the React Front end and the Node.js/Express Back end.
- ▶ Developed a responsive React interface with menu browsing, an interactive shopping cart, and a complete order placement flow.
- ▶ Built REST APIs with Express.js and integrated MongoDB to store and manage menus, orders, and user data.
- ▶ Implemented client server communication, form handling, and application state management across the full stack.

Smart Air Purifier System (Final Year Project)

IoT • Mobile App

- ▶ Co-developed an IoT-based smart air purifier monitored and controlled through a mobile application to track and improve indoor air quality.
- ▶ Integrated hardware sensors with software to deliver real-time air quality readings to the user-facing mobile app.
- ▶ Collaborated within a team across the full project lifecycle, from requirement gathering and design through implementation and testing.

EDUCATION

BS in Software Engineering - CGPA: 3.35 / 4.0

Oct 2021 – Aug 2025

Abasyn University, Peshawar

- ▶ **Relevant Coursework:** Web Development, Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Software Engineering, and Software Design & Architecture.
- ▶ **Final Year Project:** IoT-based Smart Air Purifier System controlled via a mobile application.

CERTIFICATIONS

- ▶ **Professional Freelancing** — completed comprehensive training covering client communication, requirement gathering, time management, and end-to-end digital project delivery.
- ▶ **Graphic Design Fundamentals** — gained working knowledge of core design principles, typography, color theory, and layout for creating clean, visually appealing digital assets.

CORE COMPETENCIES

- ▶ **Full-Stack Development:** building complete applications across the MERN Stack React Front ends, Node.js/Express APIs, and MongoDB databases.
- ▶ **API Development & Integration:** designing and consuming REST APIs, handling authentication, data fetching, and error handling.
- ▶ **Responsive UI Engineering:** creating mobile-first, cross-browser interfaces with clean, reusable, and maintainable components.
- ▶ **Code Quality:** writing modular code, participating in code reviews, and following the software development lifecycle (SDLC).

ADDITIONAL INFORMATION

- ▶ **Languages:** English (professional working proficiency), Urdu (native).
- ▶ **Strengths:** strong problem solving and logic building, clean and modular coding habits, and an eagerness to learn new tools and frameworks quickly.
- ▶ **Interests:** building full-stack side projects and exploring new web technologies and frameworks.
- ▶ **Availability:** open to full-time, internship, and remote MERN Stack development opportunities.
